

“Redarc saved my bacon!”

“Hi Guys”

“Just thought you would like to know that Redarc recently saved my bacon - literally!”

“I had departed for a month-long, 8000km desert trip of The Alice, Uluru, Oodnadatta, Arkaroola, Flinders Ranges and Lake Mungo.”

“We were using a rented camper trailer and the on-board electrics failed on day four.”

“I was very fortunate that I had installed a Redarc BCDC1240 and I was carrying a 72W Redarc amorphous folding solar blanket.”

“These Redarc products allowed me to continue without having to change my plans. More importantly, the fridge in my Hilux continued to work so that I didn’t have to fear giving my wife and two year old daughter food poisoning!”

“At every stop I made, it was the first piece of equipment out and set up. Thank you very much.”
